

How is BallistiSCAN different from other platforms?

BallistiSCAN is the world's lowest profile walkthrough metal detector. Designed to be ultra-portable, BallistiSCAN weighs only 17 pounds and can be operated indoors or outdoors in most weather conditions with the included 18V cordless Milwaukee batteries. Utilizing the most advanced magnetic anomaly sensors (MAD), BallistiSCAN easily detects guns, knives, and even vape devices. Only available at BALLISTIGLASS, the BallistiSCAN plug and play metal detector is the wisest choice for protecting your facility.
